

I like using my skills
and ideas to make
things.

Engineers are learning...

To explore different techniques for joining materials. (Glue Stick, PVA, Masking Tape, Tape, Split Pins)

To know how to work safely and hygienically.

To use non-standard measures (spoons, cups).

To use colours for a particular purpose.

To use some cooking techniques (spreading, cutting, threading, coring, mixing, grating, adding flavours).

To use tools to cut and join wood using different nails and screws.

To know the names of tools.

To make props and costumes for different role play scenarios.

To plan what they are going to make (cooking, wood work, construction, junk modelling).

At the end of the year Engineers can...

Safely use and explore a variety of materials tools and techniques, experimenting with colour, design, texture, form and function.

Share their creations, explaining the process they have used.

Make use of props and materials when role playing characters in narratives and stories.
